

Tamizharasan R

AI ENGINEER & FULL-STACK DEVELOPER · SEEKING AI / SDE INTERNSHIP 2026

Chennai, India | +91 97501 71224 | jefftamizh@gmail.com | linkedin/tamizharasan-r | github/Tamizh019

3rd-year B.E. CSE (AI) student at SIST, Chennai. Built a 10-agent Text-to-SQL AI platform during an AI internship at Rudhra Info Solutions. Specializing in LLM systems, RAG pipelines, and full-stack development — proficient in LangChain, Gemini API, FastAPI, and Next.js. ServiceNow Certified Application Developer (CAD).

EXPERIENCE

AI Domain Intern

Mar 2026 – Apr 2026

Rudhra Info Solutions · "Data-Talk" - AI for Database Systems

- Architected a 10-agent AI pipeline (Text-to-SQL, QA, Schema RAG, Python Sandbox) using LangChain and Gemini API, enabling non-technical users to query PostgreSQL databases in plain English with self-correcting SQL generation.
- Built the FastAPI backend with SSE-based real-time streaming, Redis result caching, pgvector schema embeddings, and Supabase conversation persistence — serving 23+ Plotly.js interactive chart types via an AI-driven visualization engine.

Java Developer Intern

Jun – Aug 2024

Enterprise CRM System · Team Project · Remote

- Engineered a multi-module CRM in Java/JDBC covering lead tracking, contact management, and pipeline workflows for enterprise operations.
- Architected normalized MySQL schemas across 5+ entity relations and implemented full CRUD backend with input validation across all modules.

PROJECTS

Chill Space – Real-Time Collaboration Platform

[Live ↗](#) [GitHub ↗](#)

2025

Next.js 16 · TypeScript · Supabase · WebSockets · Framer Motion

- Architected a full-stack real-time workspace (App Router + TypeScript); WebSocket channels deliver group messaging at sub-100ms latency.
- Implemented OAuth2 (Google) + email auth with Supabase row-level security for zero-trust data access.

Valluge – AI Smart Wardrobe

[Live ↗](#) [GitHub ↗](#)

2025

Next.js · Gemini API · PostgreSQL · Tailwind CSS

- Built an AI-powered wardrobe using Gemini API for context-aware outfit suggestions based on occasion, weather, and style profile.
- Integrated real-time weather data and an LLM-backed styling chatbot for conversational wardrobe guidance.
- Structured a PostgreSQL clothing inventory with image upload, category tagging, and filter search.

Data-Talk – Conversational AI for Databases

[GitHub ↗](#)

2026

Python · FastAPI · LangChain · Gemini API · pgvector · LlamaIndex · Redis · Supabase · Plotly.js

- Built an enterprise-grade Text-to-SQL platform with a 10-agent pipeline (routing, SQL gen, QA, Python sandbox, visualization) — lets non-technical users query any PostgreSQL database in plain English.
- Implemented Schema RAG using pgvector + LlamaIndex with MD5-hashed embedding cache, self-correcting SQL (auto-retry on DB rejection), and 23+ interactive Plotly.js chart types with AI-driven chart selection.

TECHNICAL SKILLS

Languages Python, Java, TypeScript, JavaScript, SQL

AI / ML LangChain, Gemini API, LlamaIndex, TensorFlow, Scikit-learn, FAISS, RAG, OpenCV

Web Next.js, React, FastAPI, Node.js, REST, WebSockets, SSE

Databases PostgreSQL, MySQL, Supabase, pgvector, Redis

Tools Git, Docker, Netlify, VS Code

EDUCATION

B.E. CSE – Artificial Intelligence

Sathyabama Institute of Science & Technology, Chennai
2023 – 2027 · CGPA 8.7 (3rd Year)

HSC & SSLC

Mount Saint Joseph MHSS
HSC 2023 — 81.66% · SSLC 2021 — 100%

CERTIFICATIONS
