

Tamizharasan R

AI ENGINEER & FULL-STACK DEVELOPER · SEEKING AI / SDE INTERNSHIP 2026

Chennai, India | +91 97501 71224 | jefftamizh@gmail.com | LinkedIn | GitHub / Tamizh019 | Portfolio

3rd-year CSE (AI) student at SIST, Chennai, specializing in LLM-based AI systems, RAG pipelines, and computer vision. Built 4 production applications across full-stack and AI/ML domains. Targeting AI Engineering and ML roles with hands-on experience in LangChain, TensorFlow, Gemini API, and Next.js.

EXPERIENCE

Java Developer Intern

Jun – Aug 2024

Team Project · Enterprise CRM System · Remote

- Engineered a multi-module CRM in Java/JDBC covering lead tracking, contact management, and pipeline workflows for simulated enterprise operations.
- Architected and normalized MySQL relational schemas; restructured table joins across 5+ entity relations reducing redundant query overhead.
- Implemented full CRUD backend logic with data validation across all user-facing modules, ensuring reliability for end-to-end business workflows.

PROJECTS

Chill Space – Real-Time Collaboration Platform [Live ↗](#) [GitHub ↗](#)

Next.js 16 · TypeScript · Supabase · WebSockets · Rust · Framer Motion

- Architected a full-stack real-time workspace in Next.js 16 (App Router) + TypeScript; WebSocket channels deliver group messaging at sub-100ms latency.
- Implemented OAuth2 (Google) + email verification with Supabase row-level security, achieving zero-trust data access across all user sessions.
- Shipped 9+ collaborative micro-tools (Chess, DSA Solver, Galaxy Match, Typing Race, Creative Board) in a single-page modular React architecture.
- Created a gamified Focus Mode (XP, streaks, leaderboard) with Framer Motion animations to drive productivity engagement.

Valluge – AI Smart Wardrobe [Live ↗](#) [GitHub ↗](#)

Next.js · Gemini API · PostgreSQL · Tailwind CSS

- Built an AI-powered wardrobe using Google Gemini API to generate context-aware outfit suggestions based on occasion, weather, and style profile.
- Integrated real-time weather data for dynamic outfit adjustment; built an LLM-backed styling chatbot for conversational wardrobe guidance.
- Structured a PostgreSQL-backed clothing inventory with image upload, category tagging, and filter search.

AgriVision – AI Crop Intelligence Platform [GitHub ↗](#)

Python · TensorFlow · Scikit-learn · Flask · OpenCV · MySQL

- Constructed an ML pipeline for crop yield prediction with 98% accuracy using ensemble regression and Scikit-learn on historical agri-data.
- Built a CNN-based plant disease detection module in TensorFlow + OpenCV classifying conditions across 10+ crop variants from leaf images.
- Exposed AI recommendations (fertilizer, irrigation) via a Flask REST API integrated with real-time weather data for smart farming decisions.

TECHNICAL SKILLS

LANGUAGES

Python, Java, TypeScript, JavaScript, SQL

AI / ML & LLMS

LangChain, TensorFlow, Scikit-learn, FAISS, OpenCV, Gemini API, RAG Pipelines

FRONTEND

Next.js, React.js, Tailwind CSS, Framer Motion

BACKEND & APIS

FastAPI, Spring Boot, Node.js, REST APIs, WebSockets, Supabase

DATABASES

PostgreSQL, MySQL, Supabase

TOOLS

Git, Docker, Netlify, VS Code

EDUCATION

B.E CSE – Artificial Intelligence

Sathyabama Institute of Science & Technology, Chennai

2023 – 2027 · CGPA: 8.7 (3rd Year)

HSC & SSLC

Mount Saint Joseph MHSS

HSC 2023 — 81.66%

SSLC 2021 — 100%

CERTIFICATIONS

Career Essentials in Generative AI

Microsoft & LinkedIn

Database Management Systems

NPTEL

Java Full-Stack Development

Internship Completion

MATLAB Programming

NPTEL

ADDITIONAL

- 4 production-deployed applications
- English (Professional) · Tamil (Native)
- Open to open-source & hackathons
- DSA practice — LeetCode, Codeforces
